

ALI HASSAN

Mobile App Developer | React Native

03065047072 • Alihassan13@gmail.com • Islamabad, Pakistan

PROFESSIONAL SUMMARY

Results-driven Mobile Developer with hands-on experience building production-grade mobile applications using React Native. Currently completed a Bachelor's in Software Engineering (GPA 3.25/4.0) at NUML University. Built Guard Shield 360 — a full-featured React Native app for security staff operations and shift scheduling — demonstrating strong mobile architecture, UI design, and cross-platform delivery skills. Passionate about clean code, SOLID principles, and delivering high-quality user experiences for e-commerce platforms.

TECHNICAL SKILLS

WORK EXPERIENCE

Front-End & Mobile Developer | Academic Projects | Islamabad, Pakistan | 2022 – Present

- Architected and delivered Guard Shield 360 — a React Native mobile application for managing security staff operations, real-time shift scheduling, and role-based access control; demonstrates mobile app architecture skills directly transferable to iOS development.
- Integrated RESTful APIs, handled asynchronous data flows, and implemented state management.
- Built a dynamic quiz platform (similar to Google Forms) using React.js with component-based architecture, reusable UI modules, and real-time user response handling — showcasing clean code and SOLID principles.
- Developed a responsive staging website using HTML5, CSS3, and JavaScript applying adaptive UI design principles.
- Collaborated with cross-functional teams using Git, PR reviews, and GitFlow workflows ensuring code quality and timely delivery.
- Applied unit testing practices and debugging methodologies to maintain application stability and performance.

KEY PROJECTS

Guard Shield 360 — React Native

Full-stack mobile app for security operations management. Features: real-time shift scheduling, staff role management, push notifications, and REST API integration. Demonstrates mobile architecture, async handling, and production-grade delivery.

Interactive Quiz Platform — React.js / JavaScript

Google Forms-inspired dynamic quiz application with real-time response collection, conditional logic, and component-driven architecture. Showcases clean code principles and reusable UI patterns.

Responsive Staging Website — HTML5 / CSS3 / JS

Fully responsive multi-section website demonstrating adaptive layouts, cross-browser compatibility, and front-end performance optimization.

EDUCATION

Bachelor of Software Engineering | NUML University, Islamabad | 2022 – 2026 | GPA: 3.25 / 4.0
